**Targets for the  
Shooting Sport**

**Inhalts-  
verzeichnis**

Edelmann Targets for sporting and hunting shooting are made using experience and the most modern techniques of production. The ring distances are precisely in accordance with the regulations of the shooting sport organisations (International Shooting Sport Federation, International Cross - bow Union). The card for our targets was developed especially by us to fulfil the requirements of the shooting sport. The targets have ideal shot characteristics: high dimensional stability to guarantee the accuracy of the ring distances; the special target card and print are non-reflecting and offer the best adaptation to the eye; the shot hole corresponds exactly to the calibre. To guarantee the shot-characteristics, and as protection against damp and temperature changes, the targets are sealed in plastic-foil and remain protected until they are required for use on the range.
